Space X Wants to Send You to Mars!

For several years, many people have talked about the **possibility**¹ of flying to Mars. One of the problems with such a trip, however, has been the cost: US 10 billion dollars (US\$10,000,000,000) to send one person to the red planet. Elon Musk, a **billionaire**² businessman, recently **announced**³ his plans to change this. He is the **CEO**⁴ of *Space X*, a company that he **created**⁵, and he hopes to change the world by selling tickets to Mars for only US\$200,000. How can he do this? The answer is **technology**⁶. With new technology, he believes, his company will be able to make the long trip to Mars **affordable**⁷. He plans to send the first human to Mars by 2025, and after that his company wants to send one million people to Mars in the next 40 to 100 years. To do this, Space X needs to build about 1,000 space ships. Will his company be successful? “I think he will be able to put humans on Mars because he wants to do it,” says Robert Zubrin, the president of the *Mars Society*. “Right now **NASA**⁸ can’t do it because they don’t want to.”
